TILEMASTER **SELF ADHESIVE WATERPROOF TANKING TAPE**

DESCRIPTION:

Tilemaster Self Adhesive Waterproof Tanking Tape is an alkali resistant, dual layered woven mesh tape with a self adhesive rubber butyl backing, used for waterproofing internal and external joints and junctures in wet environments.

Tilemaster Self Adhesive Waterproof Tanking Tape is a 10 metre roll length and is 100mm wide, allowing for sufficient bridging and waterproofing of hairline cracks on substrates and the reinforcement and waterproofing of internal and external corners.

PREPARATION:

Tilemaster Self Adhesive Waterproof Tanking Tape is to be used in conjunction with Tilemaster Tanking Kit & Tanking Paste to waterproof wall and floor substrates that are not already waterproofed. Tilemaster Self Adhesive Waterproof Tanking Tape is suitable for use with fully waterproof tile backer boards that require internal and external corners and junctures and board joints waterproofing.

Adhesion Type	Self Adhesive
Roll Length	10 Mtrs
Roll Width	100mm
Application Temperature	5°C and rising
Storage	Store unopened in dry conditions
Colour	White
Note	All work must be carried out in accordance with British Standard Code of Practice for floor and wall tiling BS5385
